

Very Simple Solutions: Nutritious Eating on a Budget

1. Make a grocery list, make a grocery list, make a grocery list. Then stick to the list.
2. Don't shop hungry.
3. Check out www.coupons.com and store flyers for items ON YOUR LIST that are also on sale.
4. Select produce that is in season or frozen. It's cheaper and often contains more nutrients.
5. Consider buying shelf-stable items in bulk: whole wheat pasta, brown rice, dried beans, canned tuna/chicken, peanut butter
6. Use unit pricing when shopping. Easy to do online.
7. Replace processed food items with "real food." (Whole grain cracker with peanut butter rather than the bright orange, pre-packaged crackers)
8. Be willing sacrifice time for convenience (i.e. whole carrots vs. baby carrots)
9. Cook in large quantities and freeze for later.
10. Skip out on impulse buys.
11. Cheap dinners: one pot soups, baked potato bar, use meat as a condiment not the main attraction
12. Reduce the amount of animal products you eat. This is the best thing you can do for your health and the environment. Check out www.meatlessmondays.org and <http://cheaphealthygood.blogspot.com/>
13. Plan ahead. "Meals" from vending machines and fast food restaurants always cost more.

With a little planning, a little preparation, and a little prioritization- healthy eating is quite affordable!

Whole Grains	Price per serving	Processed Grains	Price per serving
Barley	.10 per ½ cup	Ramen Noodles	.17 per package
Brown Rice	.14 per ½ cup	White Rice	.12 per ½ cup
Whole wheat pasta	.20 per ½ cup	White pasta	.12 per ½ cup

A Little Grocery Shopping Math...It's always cheaper at home than eating out. I'll prove it.

If a family of four (2 adults, 2 kids) spends \$500 per month on groceries, that's \$1.38/per meal. That's cheaper than Taco Bell!

- 4 people x 30 days x 3 meals/day = 360 meals in one month
- \$500 for groceries/360 meals = \$1.38 per meal
